

# AGI and Bob Help Empower HR Managers

Make decisions based on your employee's authentic feelings using Sentiment Analysis.

AI Sentiment Analysis helps HR identify areas of improvement, manage behaviour, make better decisions, and retain top performing employees.

By analysing meeting conversations, chat messages and email correspondence, HR Managers can benefit from:

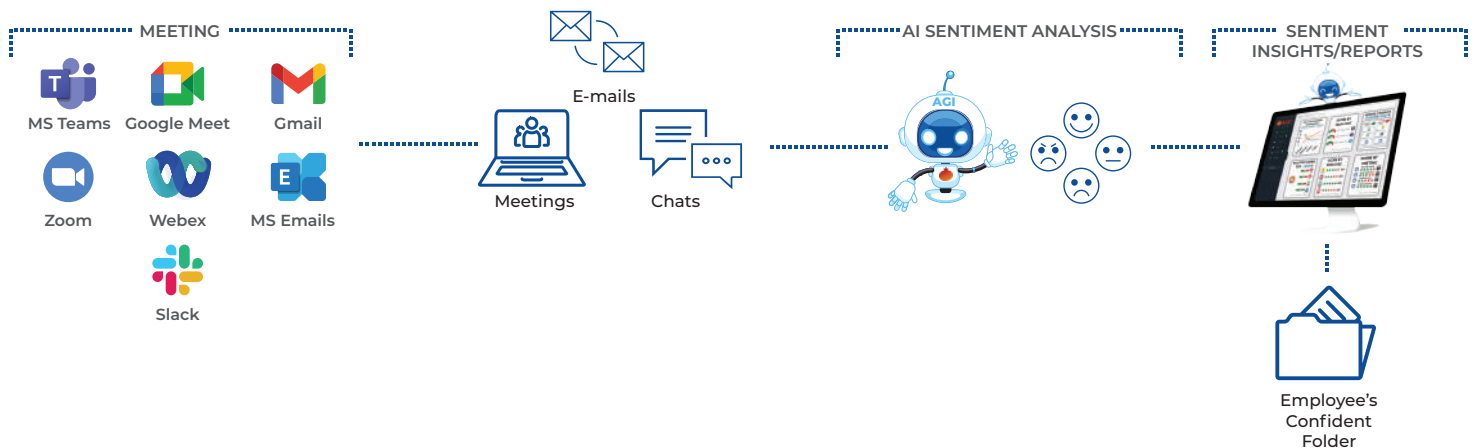

- Employee and company reports that enable better decision making, based on how employees genuinely feel.
- AI generated summaries to improve your interview and recruitment processes

## AI Sentiment Analysis Benefits

- Analyse how employee genuinely feel
- Alerts on conversation sentiment and trending topics
- Retain top-performing employees and better manage growth planning.
- Improve workplace performance.
- Measure the performance of business units.

## How Sentiment Analysis Works

After analysing all your meetings, chats and emails, AI sentiment Analysis automatically uploads insights report to each employees' confidential docs folder.

# Sentiment Analysis Reports and Features

HR Managers can access various employee specific reports and analytics, such as:
