

# Increase your monday.com Productivity with AGI - AI Virtual Assistant

AGI is an AI-powered virtual assistant that revolutionizes the way you work with monday.com.

AGI automatically detects tasks and insights, such as agenda, notes and summaries, from your meetings, chats, and email and creates them as items in the relevant monday.com board.

## ● Features

Detect & Identify

### Automatic Task Detection in real-time

AGI uses AI to detect tasks in real-time from meetings, chats, and emails. Capturing task details like title, description, due date, assignee, attendees, and a recording playback link.

### Identify Insights

AGI extracts meeting insights from transcripts, including agenda, notes, decisions, and pre-meeting files.

Generate & Create

### Create Meeting Minutes

AGI creates meeting minutes from a custom template, including insights, tasks, summaries, agenda, and decisions. Minutes can be downloaded as a PDF and shared.

### Generate Summaries

AGI automatically creates meeting summaries, offering both concise and detailed versions that highlight key points. Perfect for distributing to absentees or for a quick overview of the meeting.

## Automatic Task and Insights Synchronisation

All Tasks and insights are added to relevant boards and groups in monday.com products like Workplace Management and Sales CRM. Policies can be set based on parameters like title, participants, URL, and more.

## Sentiment Analysis

Understand your employees and customers authentic voice using AGI to detect positive and negative meetings and conversations. Get trigger alerts on trending topics, reports by users or department.

# How AGI Works

Interact with AGI in two ways:

## In-meeting App

AGI detects tasks in real-time during meetings and automatically creates accepted tasks in monday.com. Users can set confidence levels to auto-create tasks or choose to review and accept/reject them.

## Virtual Assistant Dashboard

All meeting, chat, and email tasks and insights are available in one place for users to review and search. The insights dashboard is a widget in monday.com, providing full meeting history with recording and transcript links.

## ● Benefits

### Improve project management

Stay organized with all your tasks being automatically created and assigned to the correct corresponding project board.

### Improve sales with enriched CRM data

to streamline your sales activities and increase revenue using AGI to integrate into the Monday.com CRM and save customer communication directly into the corresponding customer account.

### Automate data management

Let AGI collect and consolidate your meeting chat and email communication so you can have your information in one central place.

## AGI supports:

Microsoft Teams, Zoom, Cisco, Webex, Slack, and Google Workplace, as well as a wide array of languages.

Try AGI for free in the Monday.com marketplace and experience the best in meeting management.
