

AI Agents

Unlock Secure, Enterprise-Grade AI with Powerful Built-In Tools

Pragatix's AI Agent empowers organizations to harness the full potential of generative AI—safely, privately, and productively. Designed for enterprises that demand control, security, and performance, the AI Agent goes far beyond a basic chatbot. It executes complex tasks, enforces organizational guardrails, and integrates with your internal data—all while keeping sensitive information protected behind your firewall.

Built for Security. Designed for Flexibility

On-Prem / Private Deployment

Keep data fully isolated and under your control.

Audit & Control

Log all queries, outputs, and user activity to ensure compliance.

Policy Enforcement

Apply AI usage rules by user, department, or data source.

Model Flexibility

Choose from leading LLMs including OpenAI, Azure OpenAI, Anthropic, Mistral, and more.

Integrated AI Tools – Built Into Your Agent

Give users the ability to take action directly within the chat interface. With Pragatix's powerful tools, the AI Agent becomes a secure workspace for research, document handling, and content generation.

Tool	Functionality
Intelligent Document Processing	Extract structured data from PDFs, Word files, emails, and more.
Translation with Layout Preservation	Translate documents while keeping formatting and layout intact.

cont.

Tool	Functionality
Image Analysis	Analyze uploaded images to extract insights or detect visual patterns.
Image Generation	Create new images from text prompts without leaving the secure environment.
Web Search & Deep Research	Automate queries, summarize sources, and surface relevant insights from the web.
Speech-to-Text / Text-to-Speech	Convert voice to text or read responses aloud—ideal for accessibility and speed.

Smarter Conversations. More Control.

- **Custom Chat Agents:** Configure agents with specific data sources, tone, and functionality.
- **Real-Time Control Panel:** Choose response length, creativity level, language model, and more—on the fly.
- **Knowledge Chat Capabilities:** Upload files ad hoc, restrict answers to company data only, or allow web-based insights.
- **Collaboration-Ready:** Save favorites, share chats, and follow up with context-aware questions.
