

## AI Suite Knowledge Assistant

Smarter Conversations.  
Deeper Insights.  
Total Control.

Pragatix's Knowledge Assistant allows organizations to put their internal knowledge to work—securely and efficiently. It provides employees and teams with a powerful way to query company data, documents, and predefined sources in natural language. This is not just a chatbot; it's a flexible, compliant, and intelligent assistant designed for modern enterprises.

### Built for Enterprise. Powered by AI Suite

#### Flexible Deployment Options

Monitor AI usage, manage risks, ensure compliance, and enforce responsible AI with policy-based controls.

#### Sync & Control Data Permissions

Users receive answers strictly based on their existing access permissions across CRM, document systems, and other data sources, ensuring no unauthorized data is ever exposed.

#### Grounding

Seamlessly connect to emails, chats, meetings, CRM, websites, social media, and knowledge bases to deliver grounded, context-aware answers from your company's structured and unstructured data.

### Lite Mode & Advanced Chat Options

Pragatix's Knowledge Assistant includes Lite Mode — a streamlined interface for fast, intuitive interaction, alongside Advanced Options for users who want greater control over how the AI responds.

#### Lite Mode Highlights

- Simplified chat interface for non-technical users
- Quick access to predefined chatbot instructions and data sources
- Fast answers from internal content without needing setup or training

## Advanced Chat Options

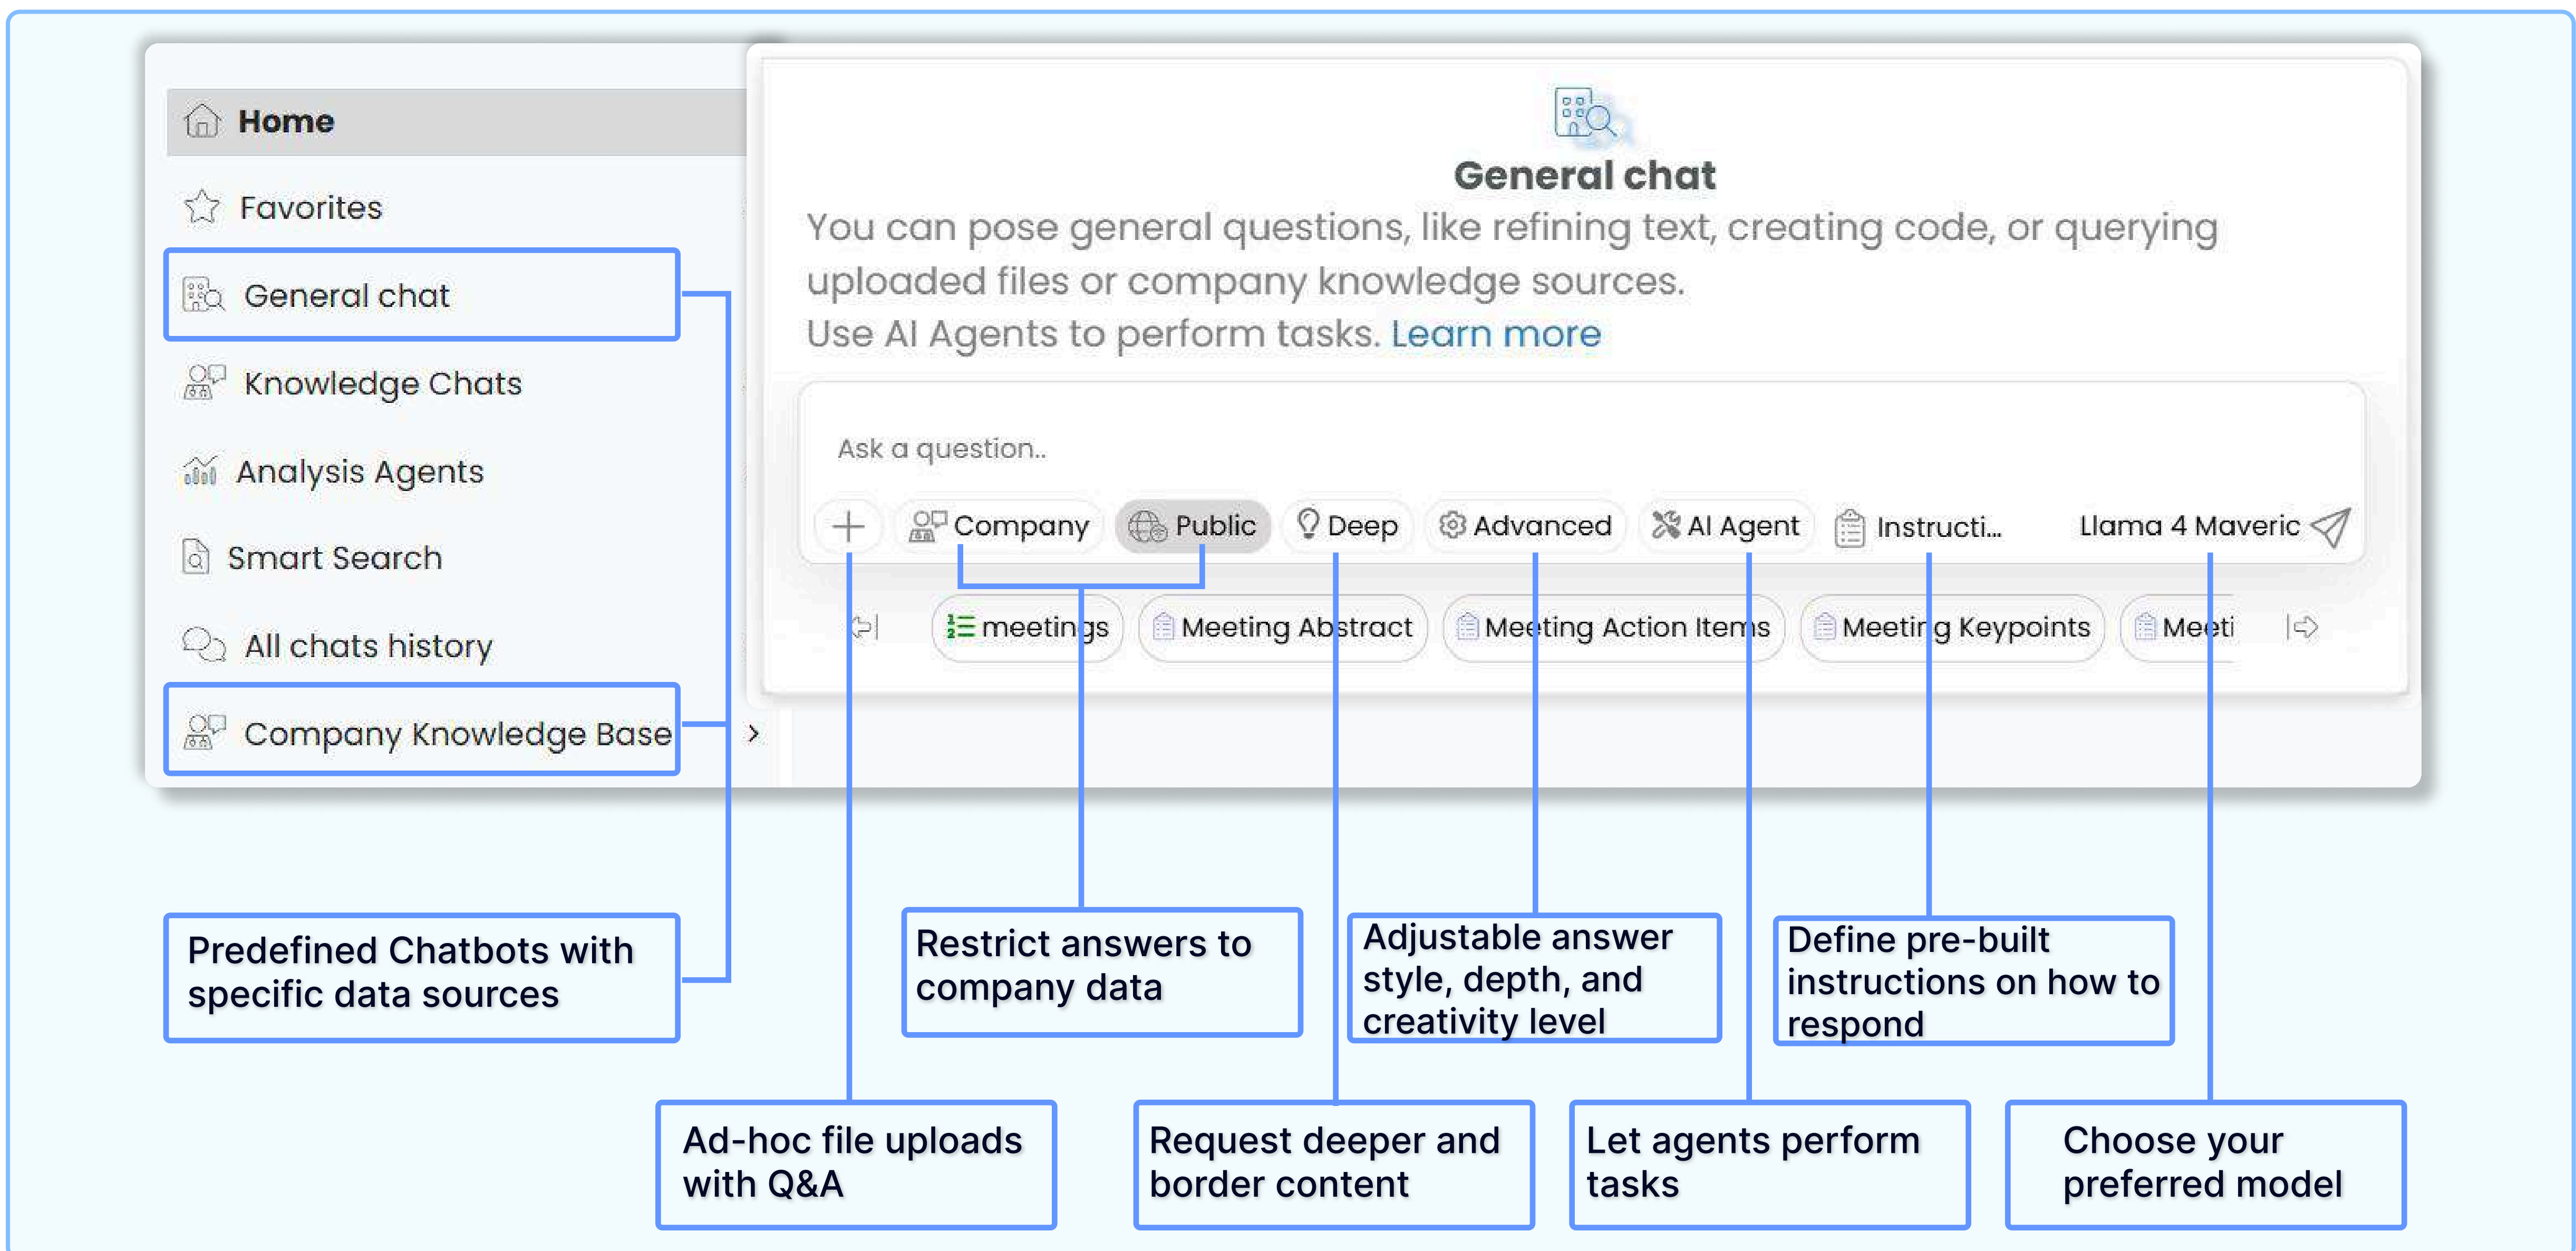

For power users and advanced workflows, the chatbot includes adjustable parameters that enhance control and customization:

- **Multiple AI models:** Select from OpenAI, Azure OpenAI, Anthropic, etc.
- **Creativity level:** Adjust from conservative to highly creative responses
- **Answer depth:** Choose from brief summaries or detailed, in-depth replies
- **Restrict answers:** Choose between company data only or include public data.
- **Let agents perform tasks:** Use built-in tools to extract data, generate images, translate files, and more directly within the chat.

## Turn Knowledge into a Competitive Advantage

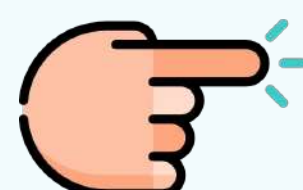

Pragatix's Knowledge Assistant transforms how teams access and interact with company knowledge. It's secure, flexible, and built for real-world business needs, making your internal data instantly useful, without compromising privacy or compliance.
