

SphereShield for Microsoft Teams

AGAT's Compliance and Productivity solutions provide a diverse set of cutting-edge tools, ensuring our customers can meet compliance and regulatory requirements whilst increasing overall productivity and efficiency.

SphereShield addresses these challenges:

- Compliance and Regulatory concerns
- Overly rigid communication controls
- Not being able to balance collaboration and compliance effectively
- Having to compromise with near real-time DLP
- Incomplete eDiscovery results
- Unusable eDiscovery reports
- Unproductive and poorly managed meetings
- Fragmented data sources

Compliance Solutions:

Inline Real-time Data Loss Protection (DLP)

[VIEW MORE](#)

Block all sensitive data in-line before it reaches its destination. Using real-time active inspection of content such as messages, files and audio.

Ethical Wall

[VIEW MORE](#)

Block and control user communication/ activities by setting granular communication policies based on groups, users, domains, conversation type, scope and more.

eDiscovery

[VIEW MORE](#)

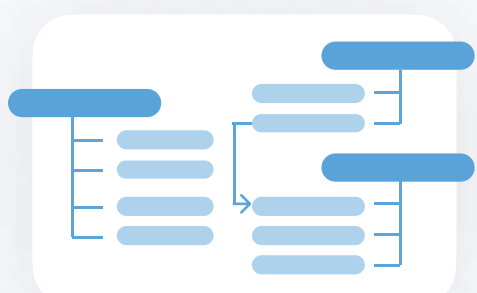

Archiving data on cloud or on site. Easy to search, view and export any communication by parameters such as user, time, channel, and text.

Governance

[VIEW MORE](#)

Control Team and Channel creation. Configure who can be a Team owner, add users or guests. Control file upload to Teams, OneDrive, and SharePoint.

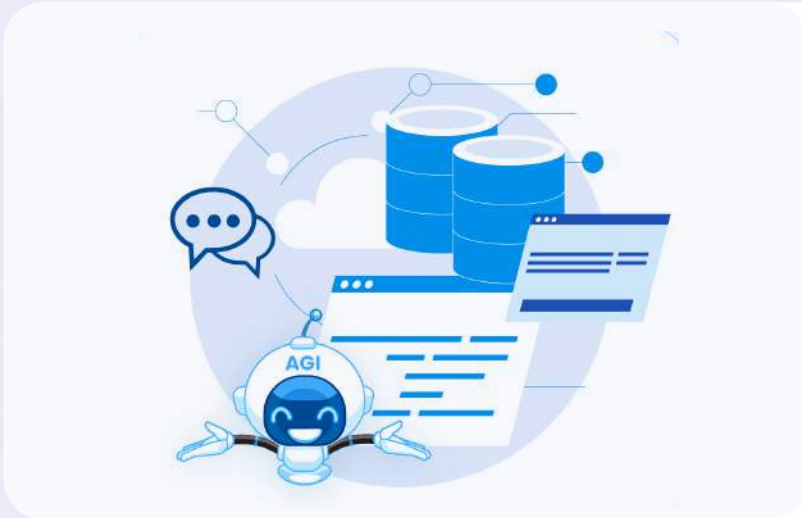

Channel Management

[VIEW MORE](#)

Manage MS Teams Channels with the ability to move, archive, and export Channels content. Retention or deletion of chats per configurable time.

Productivity Solutions:

BusinessGPT Enterprise – For employees and management

[VIEW MORE](#)

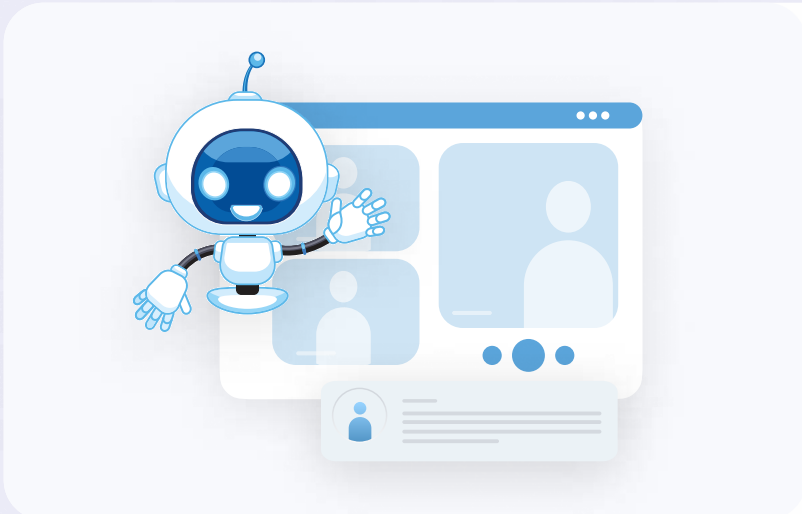

Enable permission based conversational questions over all organizational internal data such as chats, meetings, mails, documents, eDiscovery, Task and CRM systems etc.

BusinessGPT Pro – For Customers

[VIEW MORE](#)

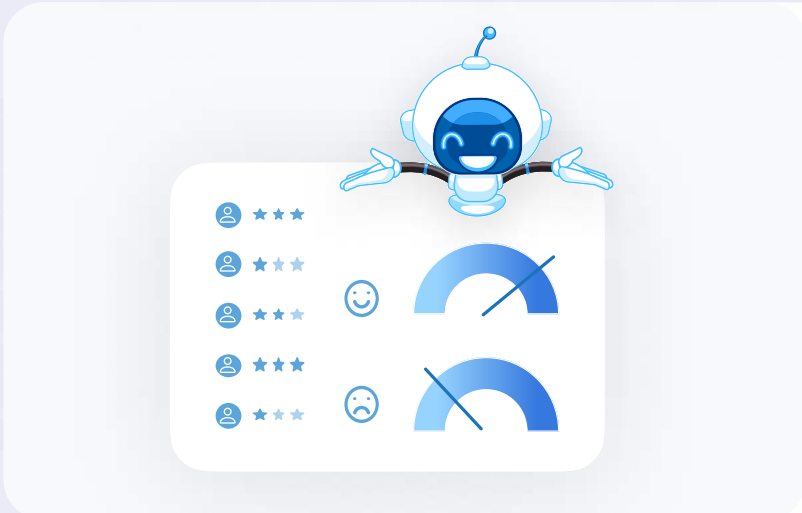

Enable conversational questions over all organizational outbound public data such as white papers, wiki and website.

Meeting Assistant – AGI

[VIEW MORE](#)

Empower meetings with AI-generated insights. Automatically generate tasks, summaries, and meeting minutes. Detect insights such as agendas, notes, and decisions.

Sentiment Analysis

[VIEW MORE](#)

Analyze meeting, chat, and email conversations to gain insights into how employees genuinely feel and improve customer satisfaction.

What our customers have to say:

CISO, fortune 500 finance institute, NYC ★★★★★

"AGAT Ethical Wall seamlessly integrated into our existing communication systems, allowing us to control interactions effectively. It provided us with the much needed confidence that sensitive information was protected, and communication guidelines were strictly followed".

Hardik Joshi, AFNI.com ★★★★★

"Our communication control in Microsoft Teams has never been better thanks to your Ethical Wall product. Highly satisfied!"

Clarissa Schelp, gastro-hero.de ★★★★★

"AGAT's SphereShield MS Teams Channel Management allowed us to move individual private and public channels. The installation and setup were hassle-free thanks to the instructions on the website. Support was always readily available and helpful!"
